Muayyad Bahtiti

IT Specialist · Application Development

Open to junior software engineering & IT roles · Remote / International

PROFILE

Motivated IT Specialist completing vocational training (Ausbildung) as a Fachinformatiker in Germany, with a solid foundation in software development, database design and IT systems. Fluent in English, German and Arabic. Seeking a junior software engineering or IT role where I can apply practical programming skills, contribute to real projects and keep growing in a remote or international environment.

EXPERIENCE

IT Specialist Trainee (Vocational Training)

Sep 2023 – 2026

Z&P Schulung · Leipzig, Germany

- Completing German vocational training (Fachinformatiker – Application Development / System Integration).
- Developing software applications and practising modern programming concepts with Python, Java and web technologies.
- Designing and managing relational databases, writing SQL queries and ensuring data integrity and normalisation.
- Supporting IT infrastructure, troubleshooting hardware and software issues and documenting technical processes.
- Collaborating on practical projects covering coding, testing and basic deployment workflows.

Interpreter (German – Arabic / Spanish)

Mar 2023 – Sep 2023

Deutsch Spanisch e.V. · Germany

- Provided accurate interpretation and translation in professional and administrative settings.
- Facilitated clear communication between German-speaking clients and Arabic- and Spanish-speaking individuals.
- Supported documentation and coordination tasks in a multicultural environment.

Vocational Preparation Program

Feb 2021 – Aug 2021

Joblinge gAG · Germany

- Took part in career orientation, professional skills training and workplace readiness activities.
- Developed teamwork, time management and communication competencies.

PROJECTS

Task Management Web Application

Web app with user authentication and full CRUD operations for task tracking.

Python · Flask · MySQL · HTML/CSS · JavaScript

Relational Database Design

Normalised inventory database for a small business, with complex queries, relationships and integrity constraints.

MySQL · SQL · ER Modelling

System Automation Scripts

Scripts for system monitoring, file management and routine automation on Linux.

Python · Bash · Linux
